Subject: RE: Additional roadworks on Leeds Road

Dear Mr Bedford.

I am writing to provide you with a further update on the temporary lights on Leeds Road that were required for some Northern Powergrid (NPG) works. These works do need completing before the upcoming closure on the 23rd July but we have asked NPG to remove the lights on Leeds Road for the remainder of this week. They will require one remaining off-peak morning of traffic management but we have postponed this until next week. We will confirm this actual date with yourself once we receive the details from NPG.

Separately we have just received information from our Network Management team that Northern Gas Networks (NGN) have a non-ELOR related emergency that they need to attend to at the Scholes Lane End/A64 junction. I do not have any further information at this stage but will share with you as soon as it comes through.

The Northern Gas repair is a priority over the NPG diversion so we will have to keep the temporary lights off of Leeds Road until NGN have completed the repair and remove whatever temporary traffic management arrangement they require to complete their work safely.

We expect both NGN and NPG works to be completed in advance of the closure.

Subject: RE: Additional roadworks on Leeds Road

Dear Mr Bedford.

This has been an oversight on my part as the detail was passed to me but I missed it due to having to deal with multiple tasks generated for the Leeds Road Closure.

I have been informed that the temporary lights will be in operation next week and it is for Northern Powergrid. These works cannot be incorporated into the closure as they need to be completed prior to works commencing on the new junction.

Regards,
